Frontend Developer

With 4 years of experience in system development, I lead teams, utilize cutting-edge technologies like React, TypeScript, and TailwindCSS, and implement CI/CD pipelines. Improved software loading time by 60% and developed a web ERP application for 10,000+ users. In just 8 months, completed 40+ courses and transitioned from an intern to a full-fledged developer.

WORK EXPERIENCE

Harmonit (formerly FRG Gestão Inteligente)

11/2023 - 10/2024

FrontEnd Developer

11/2023 - 10/2024

- Mentored and guided a team of 4 developers, resulting in a improvement in code quality, leading to a more efficient and seamless project delivery process.
- Implemented new features and optimizations to the ERP system, resulting in a 60% decrease in page load times, enhancing user experience and overall system efficiency.
- Enhanced user interface performance by 40% through the implementation of React, TypeScript, TailwindCSS, and various UI tools, resulting in improved user satisfaction and engagement.
- Improved the Bitbucket CI/CD pipeline, reducing deployment time by 90%, leading to faster feature delivery and increased productivity.
- Apply agile methodologies to plan and manage sprints, ensuring all tasks are completed efficiently and aligned with project objectives.
- Work closely with other teams, including BackEnd and DevOps, to ensure seamless integration and full functionality of developed solutions.

FRG Gestão Inteligente

04/2021 - 11/2023

FrontEnd Developer

03/2023 - 11/2023

- Guided a group of 6 FrontEnd React engineers, integrating 3 new interns and enforcing agile methodologies, leading to a boost in team collaboration and successful sprint completion.
- Streamlined software loading process, achieving a 60% improvement through packaging enhancements and the creation of a multi-modular microfrontend system with Single-SPA, resulting in enhanced application performance and user satisfaction.
- Established a CI/CD pipeline for automatic project deployment on AWS S3 and file caching on AWS CloudFront.
- Configured and managed all team tasks daily using ClickUp, collaborating with the BackEnd team to integrate the software with a RESTful API.

FrontEnd Developer

06/2022 – 03/2023

- Developed a scalable web ERP application for over 10,000 users using React and TypeScript, leading to a seamless user experience and improved operational efficiency.
- Boosted codebase maintainability by implementing reusable components with StyledComponents and TailwindCSS, reducing duplicate code and streamlining future development efforts for the team.
- Created multiple screens from designs in Figma and published them on GitLab, using well-structured and semantic commits.

Development Intern

04/2021 – 06/2022

- Mastered over 40 development courses, excelling in web programming with HTML, CSS, JavaScript, and REST APIs, leading to a strong foundation for software development.
- Maintained a legacy product, receiving tasks in kanban methods, initially on Redmine and later on Trello, using Git for version control.
